

Database Release Agreement for the TUM Gait from Audio, Image and Depth (GAID) database

Introduction

The TUM-GAID database is meant to aid research efforts in the general area of developing, testing and evaluating algorithms for gait-based human identification, especially for multimodal gait recognition using audio, image and depth data. The Institute for Human-Machine Communication (MMK), Technische Universität München (TUM) has copyright in the collection of gait video, depth and audio as well as the associated data and serves as a distributor of the TUM GAID database.

Release of the Database

To advance the state of the art in gait-based human identification, this database could be downloaded as a zip file with password protection and the password will be issued on a case-by-case basis. To receive the password, the requestor must sign this document and send it to the TUM Principal Investigator (tum_gaid@mmk.ei.tum.de) by mail, e-mail, or FAX. In addition to other possible remedies, failure to observe these restrictions may result in access being denied for the database.

Consent

The researcher(s) agrees to the following restrictions on the TUM GAID database:

1. **Redistribution:** Without prior written approval from the TUM Principal Investigator, the TUM GAID database, in whole or in part, will not be further distributed, published, copied, or disseminated in any way or form whatsoever, whether for profit or not. This includes further distributing, copying or disseminating to a different facility or organizational unit in the requesting university, organization, or company.
2. **Modification and Commercial Use:** Without prior approval from Technische Universität München, the TUM GAID database, in whole or in part, may not be modified or used for commercial purposes.
3. **Requests for the TUM GAID database:** All requests for the TUM GAID database will be forwarded to the TUM Principal Investigator.
4. **Publication Requirements:** Those seeking to include renderings of more than 10 still frames and two gait video clips from the TUM GAID database in reports, papers, and other documents to be published or released must first obtain approval in writing from TUM Principal Investigator. In no case should the still frames or video be used in any way that could cause the original subject embarrassment or mental anguish.
5. **Citation/Reference:** All documents and papers that report on research that uses the TUM GAID database will acknowledge the use of the database by including an appropriate citation to the following:
Martin Hofmann, Jürgen Geiger, Sebastian Bachmann, Björn Schuller, Gerhard Rigoll: *"The TUM Gait from Audio, Image and Depth (GAID) Database: Multimodal Recognition of Subjects and Traits,"* in Journal of Visual Communication and Image Representation, Special Issue on Visual Understanding and Applications with RGB-D Cameras, vol. 25, no. 1, pp. 195-206, Elsevier, 2014
6. **Indemnification:** Researcher agrees to indemnify, defend, and hold harmless the Technische Universität München and its Board of Trustees, officers, employees and agents, individually and collectively, from any and all losses, expenses, damages, demands and/or claims based upon any such injury or damage (real or alleged) and shall pay all damages, claims, judgments or expenses resulting from Researcher's use of the TUM GAID database.
